Summary

I'm a self-taught front-end developer with a background in musicology and violin performance. I've completed courses from SheCodes and Codecademy, and have experience with many technologies including HTML, CSS, JavaScript, React, Qwik, Tailwind CSS, Bootstrap, and most recently I'm learning TypeScript.

My background as a musician has taught me valuable skills that transfer over to the tech industry, such as perfectionism, collaboration, discipline, problem-solving, resilience, and a growth mindset. I'm committed to delivering quality work and continually learning.
